#### **GAINING GROUND: Soccer grows in the U.S.**

Major League Soccer (MLS) has come a long way over the past decade. While "football" continues to dominate as the most popular sport globally, soccer has been fighting an uphill battle to match the interest of American football in the U.S. becoming the fifth most viwed sport in 2017.

#### What is America's most popular sport since 2004?

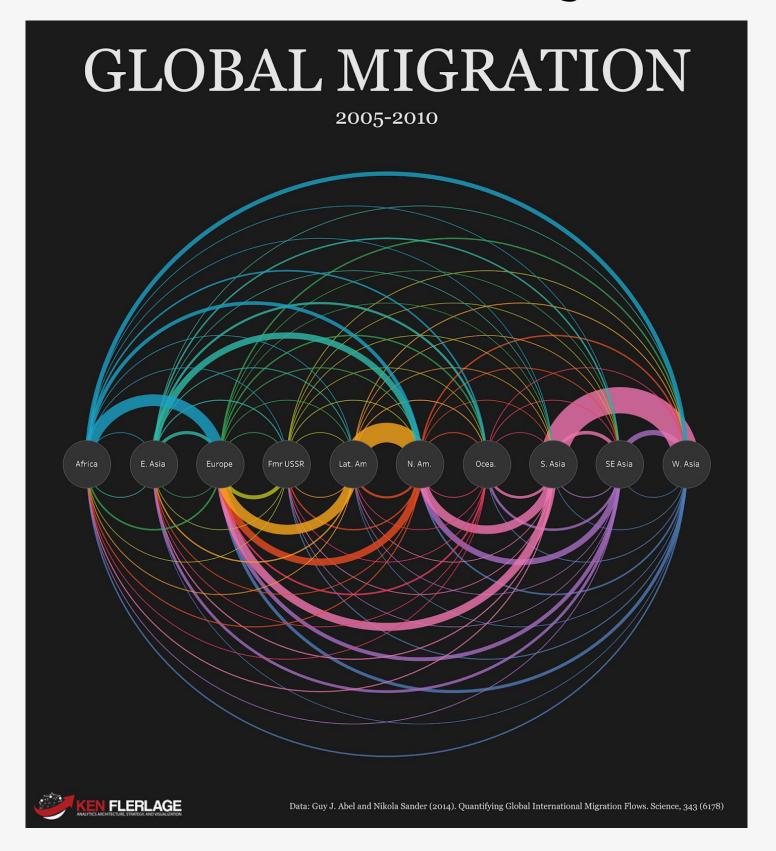

For many years, **Gallup has regularly asked**Americans which sport is their favorite to watch.
The ranking chart above shows the most profound shift that's occurred in the US sporting landscape so far when the United States was a baseball country.
Now, Americans are a football country — a place where **nearly two thirds** of all Americans

say they regularly watch football, and regular season games get bigger TV ratings than Game 7 of the Baseball World Series. Basketball, in fact, has entered a tie with baseball for third and fourth place since the early 2000's. Gallup data also shows the growth os Soccer to become the fifth favourite sport in the United States.
